

Christophe de Dinechin

Software as a Passion

SYSTEMS | LANGUAGES | TOOLS | GAMES | RESEARCH | COMMUNICATION SKILLS

◈ ABOUT

Pushing the boundaries by writing highly innovative and differentiating software, hoping to change the world one step at a time.

French software developer — operating systems, languages, games

Amateur physics researcher and tinkerer in strange forms of art

◎ KEY SKILLS

- ✓ Systems & Virtualization
- ✓ Languages & Compilers
- ✓ Tools & Apps
- ✓ Games & 3D
- ✓ Research
- ✓ Communication Skills

▤ TECHNOLOGIES

C | C++ | Virtualization | Kernel | Real-time | 3D | AI | SoC | Validation | Performance | Linux | macOS | OpenShift | RPL | XL | Tao3D | ELFE | SPICE | Make

i INFO

★ MS Computer Science, École des Mines (1991, Paris)

SYSTEMS & VIRTUALIZATION

HPVM - Enterprise-grade Itanium virtualization 2000-2010
- From first line of code and pre-silicon bring up all the way to 7 digits of revenue per quarter

HP ECUTEST Real Time Test System for car electronics 1994-1998
- Engine control unit (ECU) real-time testing and validation, 400 analog and digital I/O signals

SPICE Remote Streaming 2017-Present
- Bring the SPICE remote-access application to the modern 3D and video desktop

DxO ONE Connected Camera 2015-2016
- A tiny, but high-quality camera for photographers. Dual-core ARM + ISP, RTOS + Linux

LANGUAGES & COMPILERS

HP aC++ Compiler 1998-2000
- First native pre-silicon Itanium compiler, exception handling, templates, performance, build system

C++ ABI 1999-2000
- Initiated a cross-industry standardization effort for C++ compiler interoperability, still in use today

XL 1992-Present
- XL is an Extensible Language with interpreted and JIT modes

XLR8 2026-Present
- XLR8 is a super-fast VM with interpreted and JIT modes

DB48X - Modern RPL Calculator 2022-Present
- Best scientific calculator today, a modern rebuild of high-end HP-48 and HP-50 calculators

TOOLS & APPS

Make-It-Quick 2018-Present
- A make-based build system with auto-configuration, replaces automake/autoconf/cmake

Recorder 2017-Present
- A flight recorder for C and C++ programs, printf syntax, continuous logging, real-time graphing

Emacs on Aqua 2001-2005
- First graphical port of Emacs on macOS X (Rhapsody), first Emacs with transparent windows

GAMES & 3D

Alpha Waves / Continuum 1989-1990
- First 3D platform game ever (Guinness Book of Records), precursor of Alone in the Dark

HP-48 Games 1989-1993
- Pacman, Tetris, Lemmings, demos for a cross-compiler I had written, went viral over infrared

Tao3D 2010-Present
- Tao3D is an XL-based platform for interactive real-time 3D presentations

Taodyne 2010-2016
- A company selling Tao3D and high-end interactive 3D presentations, stereoscopy, glasses-free 3D

RESEARCH

Computer science research
- Published CS research: WIESS 2000 C++ exception handling; FOSDEM 2024 / FOSDEM 2023 talks on DB48X

12 patents awarded, 3 pending
- Covering virtualization, enterprise computing, confidential computing

Physics research
- A Theory of Incomplete Measurements — unifying GR and QM (TIM, Réunifions la physique)
